

## Summer Internship Programme 2015 – Web Designer and Programmer

### **Introduction**

PACHO is a multidisciplinary IT solution and design studio based in Hong Kong. We are passionate about giving extensive digital exploration for our clients with our tailor made solutions. We provide one stop quality services on website development, online marketing and graphic design.

Our clients are diverse, ranging from listed companies to start-ups. Other than service providing, we also develop innovative web-based products for social mission. ([www.pacho.com.hk](http://www.pacho.com.hk)).

PACHO invites applications for internship this summer. The internship programme provides opportunities for interns to work in a challenging working environment. The programme aims to develop their project management skills and technical skills such as programming, UI design and graphic design. Also, interns can obtain valuable experiences in client communications.

### **Internship Period**

Late June to August, 2015 (last for 2 months).

### **Position Openings**

2 Web Designer and 2 Programmer

### **Programme Details**

- **Learning experiences suiting different interests and abilities of interns**

Interns will be arranged to work on one or more projects according to their interests and abilities. Supervision and supports will be provided for interns in their works.

- **Training on professional Project Management skills**

Training workshops will be arranged to interns to improve their Project Management skills, such as project timeline, client communications, and quality control. Professional guest speakers with international consulting background will be invited for the session.

- **Practical opportunities in web development/design projects**

Interns will have practical opportunities to participate in web development/design projects. Interns can have chances to apply their skills and knowledge in reality.
